Executive Summary

Imotara currently provides AI/LLM-based emotional guidance and companionship. This document describes **Imotara Connect** — a real-human consultancy layer that allows verified human consultants to provide emotional, relational, and wellness support to users across all languages and time zones.

This feature positions Imotara beyond a chatbot into a **full mental wellness ecosystem**: AI-first for everyday reflection, and human-first for deeper support moments. Both layers share the same user account, history, and settings.

Billing Model (Updated from original spec): Per-minute pre-pay wallet system. Users recharge based on expected duration. Imotara takes 20% at recharge time. Both user and consultant see minutes (not money). Session auto-ends when balance reaches zero. Unused minutes stay for next session with the same consultant.

CONSULTANT ROLES	PLATFORM FEE	YR-1 OPTIMISTIC REVENUE

2 Consultant Categories

All 12 categories are non-clinical — peer support and wellness companionship, not licensed therapy. Prominent disclaimers required on all flows. MVP launches with Mental Wellness Companion only. All 12 available in Phase 2+.

Male Friend Phase 2

Peer-style emotional support. Casual, conversational, relatable.

Female Friend Phase 2

Peer-style emotional support for users seeking feminine empathy.

Dad Phase 2

Parental-figure guidance. Encouragement, life advice, stability.

Mom Phase 2

Nurturing, warm parental support. Deep empathy and care.

Sister Phase 2

Sibling-style empathy and honest perspective.

Brother Phase 2

Brotherly support — grounded, practical, encouraging.

Male Wellness Companion MVP

Structured emotional guidance with a wellness framework.

Female Wellness Companion MVP

Structured emotional guidance with empathetic female presence.

Grandfather

Phase 2

Elder-wisdom, life experience, calm perspective.

Grandmother

Phase 2

Nurturing, story-based elder guidance and warmth.

Yoga Instructor

Phase 3

Mindfulness, breathwork, meditation-led sessions.

Physical Wellness Companion

Phase 3

Body-mind integration, fitness motivation, energy coaching.

3 User Flows

3.1 User (Seeker) Journey

Browse Consultants

- Filter: category / language / rating / availability / gender / expertise
- View profile: photo, bio, expertise tags, languages, rate, reviews
- Instant connect (consultant online now)
 - Check wallet balance (sufficient for ≥ 1 minute?)
 - If insufficient: Recharge flow
 - Select duration (15 / 30 / 60 / custom min)
 - See breakdown: consultant fee + 20% platform fee = total
 - Pay via Razorpay / Stripe
 - Balance credited (in minutes)
 - Send instant request → Consultant accepts (60s window)
 - Enter session immediately (text chat MVP, audio/video Phase 3)
- └─ Schedule meeting (consultant offline)
 - Type preferred time in text field
 - Submit request → Consultant sees it and accepts/proposes alternative
 - When consultant accepts: recharge to confirm
 - Join at agreed time
- Post-session: Rate (1–5 stars) + optional review text
- Optional: Rebook, AI reflection note linked to session

3.2 Consultant (Provider) Journey

Register as Consultant (via same Imotara account)

- Fill profile: name, photo, expertise tags, bio, languages, rate, currency
- Accept Code of Conduct (mandatory checkbox)
- Submit → Admin review (email + in-app status)
- Approved → Set online status → Go Live

Accept requests:

- └─ Instant: notification arrives → 60s to Accept / Decline
 - On accept: session starts immediately
- └─ Scheduled: approve / suggest alternative time

Conduct session (text chat MVP):

- Both see live minute countdown
- Session auto-ends at 0 balance
- Add private notes (not visible to user)

After session:

- Earnings credited to wallet (80% of session amount)
- Request payout (UPI / Bank / PayPal)

4

Feature List

4.1 Consultant Registration & Verification

FEATURE	MVP	DESCRIPTION
Multi-step registration form	MVP	Name, photo, expertise tags, bio, languages, rate, currency, CoC agreement
Code of Conduct agreement	MVP	Mandatory checkbox before submission
Admin review + email notification	MVP	In-app status (pending/approved/rejected) + email on decision
Government ID verification	Phase 2	Aadhaar / Passport upload to private Supabase bucket
Certification badge upload	Phase 2	Optional wellness/yoga/counselling certificates
Video intro	Phase 2	60-second intro video on consultant profile
Annual re-verification	Phase 3	Reminder 30 days before expiry

4.2 Consultant Profile (Public)

FIELD	MVP	DESCRIPTION
Photo + name	MVP	Required — uploaded to Supabase Storage
Expertise tags	MVP	Multi-select from 12 predefined tags (Stress, Grief, Loneliness, etc.)
Bio / experience description	MVP	Free text max 500 chars — shown on profile card
Languages spoken	MVP	Multi-select with "Speaks your language" badge

Rate per minute + currency	MVP	7 supported currencies, displayed in user's local currency
Online status indicator	MVP	Green dot — live via Supabase Realtime
Rating + review count	MVP	Aggregate star rating (shown once ≥ 1 review)
Sessions completed	MVP	Credibility signal (shown once above 10)
Verification badge	Phase 2	Green checkmark once ID verified
Video intro	Phase 2	60-second intro video
Availability note	MVP	Free text e.g. "Weekday evenings IST"

4.3 Discovery & Matching

FILTER / FEATURE	MVP	DESCRIPTION
Gender preference	MVP	Show only male / female / any
Language filter	MVP	Match consultants who speak user's language
Online now filter	MVP	Show only available consultants
Expertise tag filter	MVP	Filter by area of focus
Rating filter	Phase 2	Minimum star threshold
Sort options	Phase 2	Highest rated, lowest price, most sessions, soonest available
AI recommendations	Phase 4	Curated suggestions based on mood history
Featured listings	Phase 4	Admin-promoted spots (paid by consultants)

4.4 Session Interface

FEATURE	MVP	DESCRIPTION
---------	-----	-------------

Text chat (Supabase Realtime)	MVP	Persistent chat history, full session replay
Live minute countdown	MVP	Ticks down every second, API tick every 60s
Auto-session end at 0 balance	MVP	30-second warning, then session completes
Emergency crisis button	MVP	Always visible — opens regional hotlines modal
Non-clinical disclaimer	MVP	Shown at session start
Audio call (WebRTC)	Phase 3	Daily.co managed WebRTC
Video call (opt-in)	Phase 3	Consultant can disable camera
Session extension	Phase 3	Add more minutes mid-session
Screen share	Phase 4	Yoga / physical wellness consultants

4.5 Post-Session

FEATURE	MVP	DESCRIPTION
Rating & review	MVP	1–5 stars + optional text (max 200 chars). Updates consultant rating_avg.
Consultant private note	MVP	Visible only to consultant, never to user
Mood check-in	Phase 2	1–5 emoji scale linked to Imotara mood tracking
Rebook prompt	Phase 2	"Book your next session with [Name]?" CTA
Tip consultant	Phase 2	Optional tip (10% to Imotara, 90% to consultant)
Private AI reflection	Phase 3	AI-generated journal entry linked to session

5

Revenue Model & Billing

5.1 Per-Minute Billing (Core Model)

Key design principle: Both user and consultant see time (minutes), never money amounts. The 20% platform fee is invisible — deducted at recharge. This eliminates awkward "how much did I spend?" conversations during sessions.

Consultant sets rate: R per minute (their currency)

User recharges: A (any supported currency)

Platform fee (20%): $A \times 0.20 \rightarrow$ Imotara

Consultant credit (80%): $A \times 0.80$

Minutes credited: $(A \times 0.80) / R$

During session: 1 min deducted every 60 seconds

Warning at: <1 minute remaining

Auto-complete at: 0 minutes

After session (T min used):

Imotara keeps: already held from recharge

Consultant earns: $T \times R \times 0.80$

5.2 Additional Revenue Streams (Full Vision)

REVENUE SOURCE	IMOTARA CUT	CONSULTANT RECEIVES	PHASE
Standard per-minute session	20%	80% (net of platform fee)	MVP
Session tip	10%	90%	Phase 2

Top performer loyalty (4.7+, 100+ sessions)	15%	85%	Phase 3
Featured listing	₹500/mo or \$6/mo flat	—	Phase 4
Subscription credit bundles (Pro/Family tier)	40% when redeemed	60%	Phase 4

5.3 Multi-Currency Support

CURRENCY	PAYMENT GATEWAY	EXCHANGE RATE SOURCE
INR (Indian Rupee)	Razorpay	Daily refresh from open.exchangerate-api.com
USD, EUR, GBP, AED, SGD, AUD	Stripe	Cached in Supabase app_settings daily

Consultant sets rate in their currency. User sees rate converted to their local currency. Payment processed in user's currency. Consultant earns in their set currency.

5.4 Pricing Range (Suggested)

MARKET	SUGGESTED RATE RANGE	EXAMPLE 30 MIN COST
India (INR)	₹20–₹150 / minute	₹720 – ₹5,400
International (USD)	\$0.50–\$5 / minute	\$18 – \$180

5.5 Year-1 Revenue Projections

METRIC	CONSERVATIVE	OPTIMISTIC
Active consultants	50	200
Avg sessions / consultant / month	30	60
Avg session revenue	₹599	₹799

Monthly GMV	₹8.99L	₹95.9L
Imotara monthly revenue (20%)	₹1.8L	₹19.2L
Annual Imotara revenue	₹21.6L	₹2.30 Cr

5.6 Integration with Imotara Subscription Tiers (Phase 4)

IMOTARA TIER	CONNECT BENEFIT
Free	Pay per minute — no discount
Plus	5% discount on all session recharges
Pro	60 free minutes per month included
Family	30 free minutes/month per family member (max 4)
Enterprise / EDU	Bulk minute credits via org admin dashboard

6

Consultant Profile Standard

Required Fields at Registration

FIELD	TYPE	REQUIRED	NOTES
Display name	text	Yes	Public-facing name
Photo	image upload	Yes	Stored in Supabase Storage (public bucket for approved)
Gender	select: male/female	Yes	Used for filtering
Expertise tags	multi-select	Yes (min 1)	Stress & Anxiety, Grief & Loss, Loneliness, Relationship Support, Career & Work Stress, Parenting Support, Anger Management, Self-Esteem, Life Transitions, Trauma Support, Mindfulness, Emotional Balance
Bio / experience	textarea (max 500)	Yes	Background, approach, what users can expect
Languages	multi-select	Yes (min 1)	ISO language codes
Rate per minute	number	Yes	In their currency
Currency	select	Yes	INR / USD / EUR / GBP / AED / SGD / AUD
Availability note	text (optional)	No	e.g. "Weekday evenings IST"
Code of Conduct	checkbox	Yes	Must check before submit

7

Architecture & Database Schema

7.1 System Overview

7.2 Key Tables Summary

TABLE	PURPOSE	KEY FIELDS
connect_consultants	Consultant profiles + status	user_id, expertise_tags, rate_per_min, currency_code, is_online, status, coc_agreed
connect_sessions	Session records (instant + scheduled)	user_id, consultant_id, type, status, minutes_used, rating

connect_messages	Realtime chat messages	session_id, sender_id, content — Realtime enabled
connect_wallet	User balance + consultant earnings	balance_amount, earned_amount, pending_payout
connect_recharges	Payment + minute credit records	amount, platform_fee, consultant_credit, minutes_credited
connect_payouts	Consultant withdrawal requests	amount, payout_method, status

RLS: All 6 tables have Row-Level Security. Writes to connect_wallet and connect_recharges are service-role only (no direct client writes). connect_messages and connect_sessions are added to the Supabase Realtime publication.

7.3 Call Infrastructure (Phase 3)

PROVIDER	PROS	CONS	COST
Daily.co ★ Recommended	Managed WebRTC, simple REST API, HIPAA-eligible	Per-minute pricing	~\$0.004/participant/min
LiveKit	Open-source, self-hostable, cheaper at scale	More ops overhead	Server cost only
Agora	Popular in India, low latency	Proprietary, vendor lock-in	~\$0.0099/min

Recommendation: Start with Daily.co for zero-ops launch. Migrate to self-hosted LiveKit at scale (crossover ~20,000 min/month).

8

API Design

User-Facing Endpoints

GET	/api/connect/consultants	-- browse with filters
GET	/api/connect/consultants/:id	-- public profile
POST	/api/connect/sessions	-- create instant or scheduled session
GET	/api/connect/sessions	-- user's session history
PATCH	/api/connect/sessions/:id	-- accept / decline / complete / cancel
POST	/api/connect/sessions/:id/tick	-- deduct 1 min (called every 60s)
POST	/api/connect/sessions/:id/review	-- submit rating + review
GET	/api/connect/wallet	-- balance + minutes + earnings
POST	/api/connect/wallet/recharge/create	-- create Razorpay order
POST	/api/connect/wallet/recharge/verify	-- verify payment → credit minutes

Consultant-Facing Endpoints

POST	/api/connect/consultant/register	-- submit registration
PATCH	/api/connect/consultant/profile	-- update bio, rate, tags, photo
PATCH	/api/connect/consultant/status	-- toggle online/offline
GET	/api/connect/consultant/earnings	-- earnings breakdown
POST	/api/connect/consultant/payout	-- request withdrawal

Admin Endpoints

GET	/api/admin/connect/pending	-- pending applications queue
PATCH	/api/admin/connect/:id/approve	-- approve / reject + send email
GET	/api/admin/connect/consultants	-- all consultants (all statuses)
PATCH	/api/admin/connect/consultants/:id	-- suspend / reinstate

Phase 3+ Endpoints (Audio/Video)

POST	/api/connect/calls/create-room	-- generate Daily.co / LiveKit token
POST	/api/connect/calls/:id/end	-- end call + trigger payout
GET	/api/admin/connect/sessions	-- session audit log with call metadata

GET

/api/admin/connect/analytics

-- GMV, revenue, top consultants

GET

/api/admin/connect/payouts

-- payout management

9

Mobile App Additions

SCREEN	PHASE	DESCRIPTION
ConnectScreen	MVP	New 5th bottom tab — browse consultants, wallet balance, non-clinical disclaimer
ConsultantProfileScreen	MVP	Full profile with expertise tags, bio, rate. Talk Now / Request Meeting buttons.
RechargeScreen	MVP	Duration picker + cost breakdown + Razorpay payment
ConnectChatScreen	MVP	Real-time chat, timer bar, emergency button (top-right), post-session review
ConsultantDashboardScreen	MVP	Online toggle, pending requests, earnings summary
RegisterConsultantScreen	MVP	3-step registration with CoC agreement
LiveCallScreen	Phase 3	Audio/video call with Daily.co SDK, session timer, text chat sidebar

10

Safety, Compliance & Trust

10.1 Non-Clinical Disclaimer (Mandatory — MVP)

Display on: Every consultant card, consultant profile page, session start screen, consultant registration form.

"Imotara Connect provides peer wellness companionship only. Companions are not licensed therapists or medical professionals. If you are in crisis, please use the help button below."

10.2 Emergency Protocol (Mandatory — MVP)

Single-tap "Need Help?" button inside every active session (always visible, even during text chat). Opens a modal — does not navigate away from session.

COUNTRY	ORGANISATION	NUMBER
India	iCall / Vandrevala / Snehi	9152987821 / 1860-2662-345 / 044-24640050
USA	988 Suicide & Crisis Lifeline	988
UK	Samaritans	116 123
International	Find A Helpline	findahelpline.com

10.3 Age Gate (Mandatory — MVP)

Under-18 users cannot access /connect. Check `profiles.date_of_birth` on page load. If null, prompt for birth year. Redirect under-18 to /connect/age-restricted page explaining the restriction.

10.4 Code of Conduct (Mandatory — MVP)

Consultants must check a CoC box at registration. Stored as `coc_agreed = true`. API rejects registration without it.

CoC prohibitions: No clinical / medical / legal advice · No romantic or sexual advances · No financial solicitation outside the platform

Enforcement: Warning → 30-day suspension → Permanent ban (three-strike policy in Phase 2)

10.5 Trust & Safety Metrics (Phase 2+)

SIGNAL	THRESHOLD	ACTION
Low rating	Below 3.5 stars on 10+ sessions	Auto-flag for admin review
Abandonment rate	>20% abandonment	Flag for investigation
User reports	3+ reports in 30 days	Temporary suspension pending review
Emergency signal trigger	Any	Session logged; admin notified same day

10.6 GDPR & DPDPA Compliance

- Session content not stored beyond what's needed for history
- Government ID docs in encrypted private Supabase bucket (Phase 2) — signed URLs only for admin reviewers
- DPIA (Data Protection Impact Assessment) required before Connect goes live
- Consultant right-to-erasure: profile + messages deleted on account deletion (cascade)
- Retention: financial records (7 years), session content (user-controlled deletion)

11

Admin Panel Enhancements

The existing /admin panel covers 0% of Connect requirements. MVP adds one new section; full vision adds 5 tabs. The existing auth system, UI patterns (dark glass cards, table layout, action badges), and API conventions (Bearer token, PATCH with audit trail) are fully reusable.

TAB	MVP	KEY CAPABILITIES
Connect Applications	MVP	Pending queue, view profile, approve/reject with email, rejection reason
Consultants	MVP	All consultants list, suspend/reinstate, payout requests
Verifications	Phase 2	ID document review queue, signed URL viewer, verification audit trail
Sessions	Phase 3	All sessions, emergency signal log, dispute handling, manual refund
Connect Analytics	Phase 3	GMV dashboard, platform revenue, top consultants, category breakdown
Payouts	Phase 3	Pending payouts, mark as processed, payout history, CSV export

12 Implementation Phasing

1 MVP — Text Chat + Billing

6–8 weeks

- DB schema (6 tables + RLS + Realtime)
- Admin approval + email notification
- Per-minute wallet + Razorpay recharge
- Session timer (60s tick API)
- Age gate (under-18 block)
- Consultant dashboard (earnings + online toggle)
- Exchange rate service (daily cron)
- Consultant registration + CoC
- Browse consultants (web + mobile)
- Supabase Realtime text chat
- Non-clinical disclaimer + emergency button
- Post-session ratings + reviews
- Connect nav tab (web + mobile)

2 Profile Depth + 12 Categories + Trust

4–5 weeks

- Government ID verification (Aadhaar/Passport)
- Video intro upload (60s)
- Rebook prompt + tip consultant
- Three-strike CoC enforcement
- Rating filter + sort options (browse)
- All 12 consultant categories
- Mood check-in post-session
- Verification badge on profiles
- Trust & safety auto-monitoring
- Admin Verifications tab

3 Audio / Video Calls

4–6 weeks

- Daily.co WebRTC integration
- Video call (opt-in, consultant controls)
- Network quality indicator
- Automated payout system
- Audio call interface (web + mobile)
- Session extension mid-call
- Admin Sessions + Analytics tabs
- AI reflection note post-session

4 Growth & Optimisation

Ongoing

- AI-powered consultant recommendations
- Featured listing system

- Subscription tier integration (Pro/Family)
- Top performer loyalty (85/15 split)
- LiveKit migration (at ~20K min/month)
- Multi-language bio AI translation
- Review fraud detection
- Annual re-verification system

13

Technology Decisions

CONCERN	DECISION	RATIONALE
Session medium (MVP)	Supabase Realtime text chat	Zero new dependencies, already in stack, persistent history
Session medium (Phase 3)	Daily.co → LiveKit at scale	Daily.co = zero ops to ship fast; LiveKit = cost savings at scale
Billing model	Per-minute pre-pay wallet	Better UX (user controls spend), auto-ends session at 0, no billing disputes
Payments (India)	Razorpay (existing)	Already integrated in codebase
Payments (International)	Stripe (existing)	Already integrated in codebase
Exchange rates	open.exchangerate-api.com (free tier)	Daily refresh, cached in Supabase app_settings
Online presence	Supabase Realtime	Already in stack; PostgreSQL LISTEN/NOTIFY
ID document storage	Supabase Storage (private bucket)	AES-256 at rest; signed URL access; admin-only
Notifications	Existing SMTP + Expo Push	Both already operational; no new dependencies
Consultant auth	Same Imotara account	No separate login — user account gains consultant role on approval

14 Risks & Mitigations

RISK	SEVERITY	MITIGATION
Consultant quality issues	High	Admin approval gate + ratings system + three-strike CoC enforcement (Phase 2)
Boundary violations (romantic/sexual)	High	Strict CoC at registration + in-session report button + session flagging
Child safety	High	Age gate (under-18 hard block) in MVP — checks date_of_birth on page load
Clinical boundary (regulatory)	High	Non-clinical disclaimer everywhere; no mental health condition targeting in marketing
Consultant no-shows (scheduled)	Medium	Balance not charged until session starts; strike for no-shows (Phase 2)
Balance tick desync (client/server)	Medium	Server is authoritative — client timer is display-only. API tick every 60s is ground truth.
Currency conversion disputes	Medium	Show exact amount + conversion rate at recharge time; email receipt with breakdown
Payment fraud	Medium	Razorpay built-in fraud detection; HMAC verification on webhook
GDPR — session content handling	Medium	DPIA required before launch; session messages deletable by user; retention policy documented
Consultant earnings dispute	Medium	Full connect_recharges audit trail; admin can view exact split per session

Imotara Connect — Full Vision · Version 2.0 · June 2026 · Internal Use Only · Not for External Distribution
